

## Data Collection and Preprocessing Phase

Date	21 June 2024
Team ID	739680
Project Title	Estimating Presence or Absence of smoking Through Bio Signals
Maximum Marks	2 Marks

### Data Collection Plan & Raw Data Sources Identification Report:

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

### Data Collection Plan:

Section	Description
Project Overview	The project aims to develop a system that utilizes biosignals obtained from wearable devices to accurately estimate the presence or absence of smoking behavior in individuals. Smoking is a significant public health concern globally, and traditional methods of monitoring smoking behavior often rely on self-reporting, which can be unreliable due to biases and inaccuracies.
Raw Data Sources Identified	The raw data sources for this project include datasets obtained from Kaggle & UCI, the popular platforms for data science competitions and repositories. The provided sample data represents a subset of the collected information, encompassing variables such as gender,

### Raw Data Sources Report:

Source Name	Description	Location/URL	Format	Size	Access Permissions
Kaggle Dataset	The dataset comprises applicant details (gender,age,height,waist,weight,eyesight)	<a href="#">Body signal of smoking (kaggle.com)</a>	CSV	4 MB	Public
